

CryptoWorkPlace

www.cryptoworkplace.io

Our mission is to develop the safest innovative devices and systems to protect personal data and client's finances all around the world.

Problem

Roughly **\$1.1 billion** worth of cryptocurrency was stolen in the first half of 2018, and unfortunately for owners, it's pretty easy to do, according to cybersecurity company Carbon Black

<https://www.cnbc.com/2018/06/07/1-point-1b-in-cryptocurrency-was-stolen-this-year-and-it-was-easy-to-do.html>

"One major internet service provider (ISP) reports that it sees **80 billion malicious scans a day**, the result of automated efforts by cybercriminals to identify vulnerable targets"

<https://future.internetsociety.org/>

Gartner Research forecast that over **\$113 billion** will be spent on cybersecurity in 2020.

360° Secured

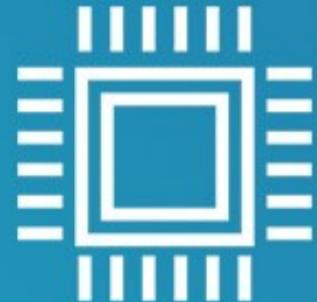

Cybersecurity Eco-system powered by Crypto Computer

State-of-the-art solution
created to protect personal data & finances

Technology

CWP micro-computer uses state-of-the-art high-performance processor and own memory devices. It is connected to the donor-computer via USB-port, from which it is powered up. When the micro-computer is plugged, it is seen as a standard network interface controller.

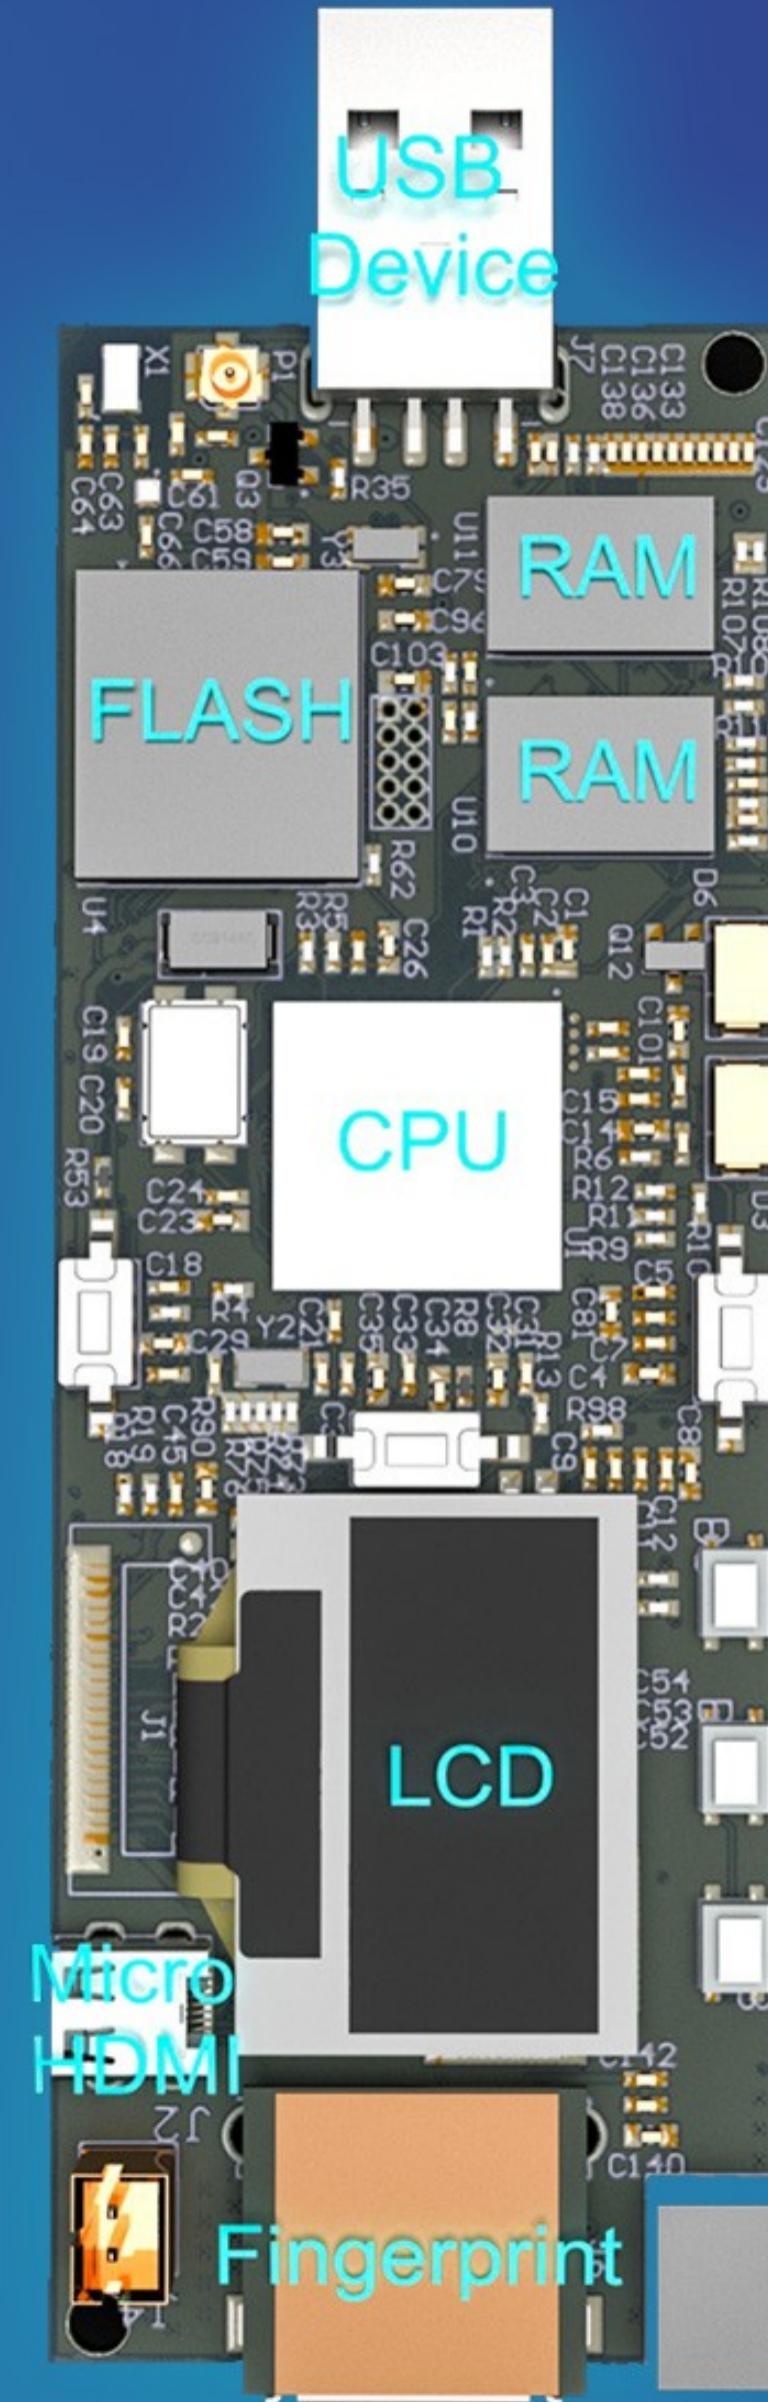

A secure tunnel (VPN-tunnel) is arranged above the network connection, and absence of device lock is checked on CWP web-portal

Operating system of a CWP micro-computer is located in a write-protected storage partition and does not allow any changes to be made neither by user, nor by malicious software.

Installation of the required software and its update are performed only via CWP web-portal. The launch or modification of programs without CWP-generated signature is not allowed.

How does it work?

1. Connect

Connect your CWP to

- PC
- laptop
- TV

You will need the access
to the Internet.

2. Activate

- Activate your device on CryptoWorkPlace portal, obtain certificate and device passport
- Customize
- Install the most interesting and secure applications

3. Use

Work distantly from any location around the globe with your files, personal data and electronic currency in decentralized eco-system. Public WI-FI and a PC with a malicious content is no more a problem for you.

BLUETOOTH

Product versions

CWP LITE

A standard solution for one user providing protection of their crypto-wallets and keys, safe Internet access, VPN router mode, secure messenger, a set of partner applications at the same time.

CWP DUO

A set of two CWP Lite micro-computers, configured to work simultaneously with one common or two separate wallets. Safe mutual fund transfer in a click / by timer / by smart-contract with the device switched on. You only have to connect CWP to a charger with a USB-port.

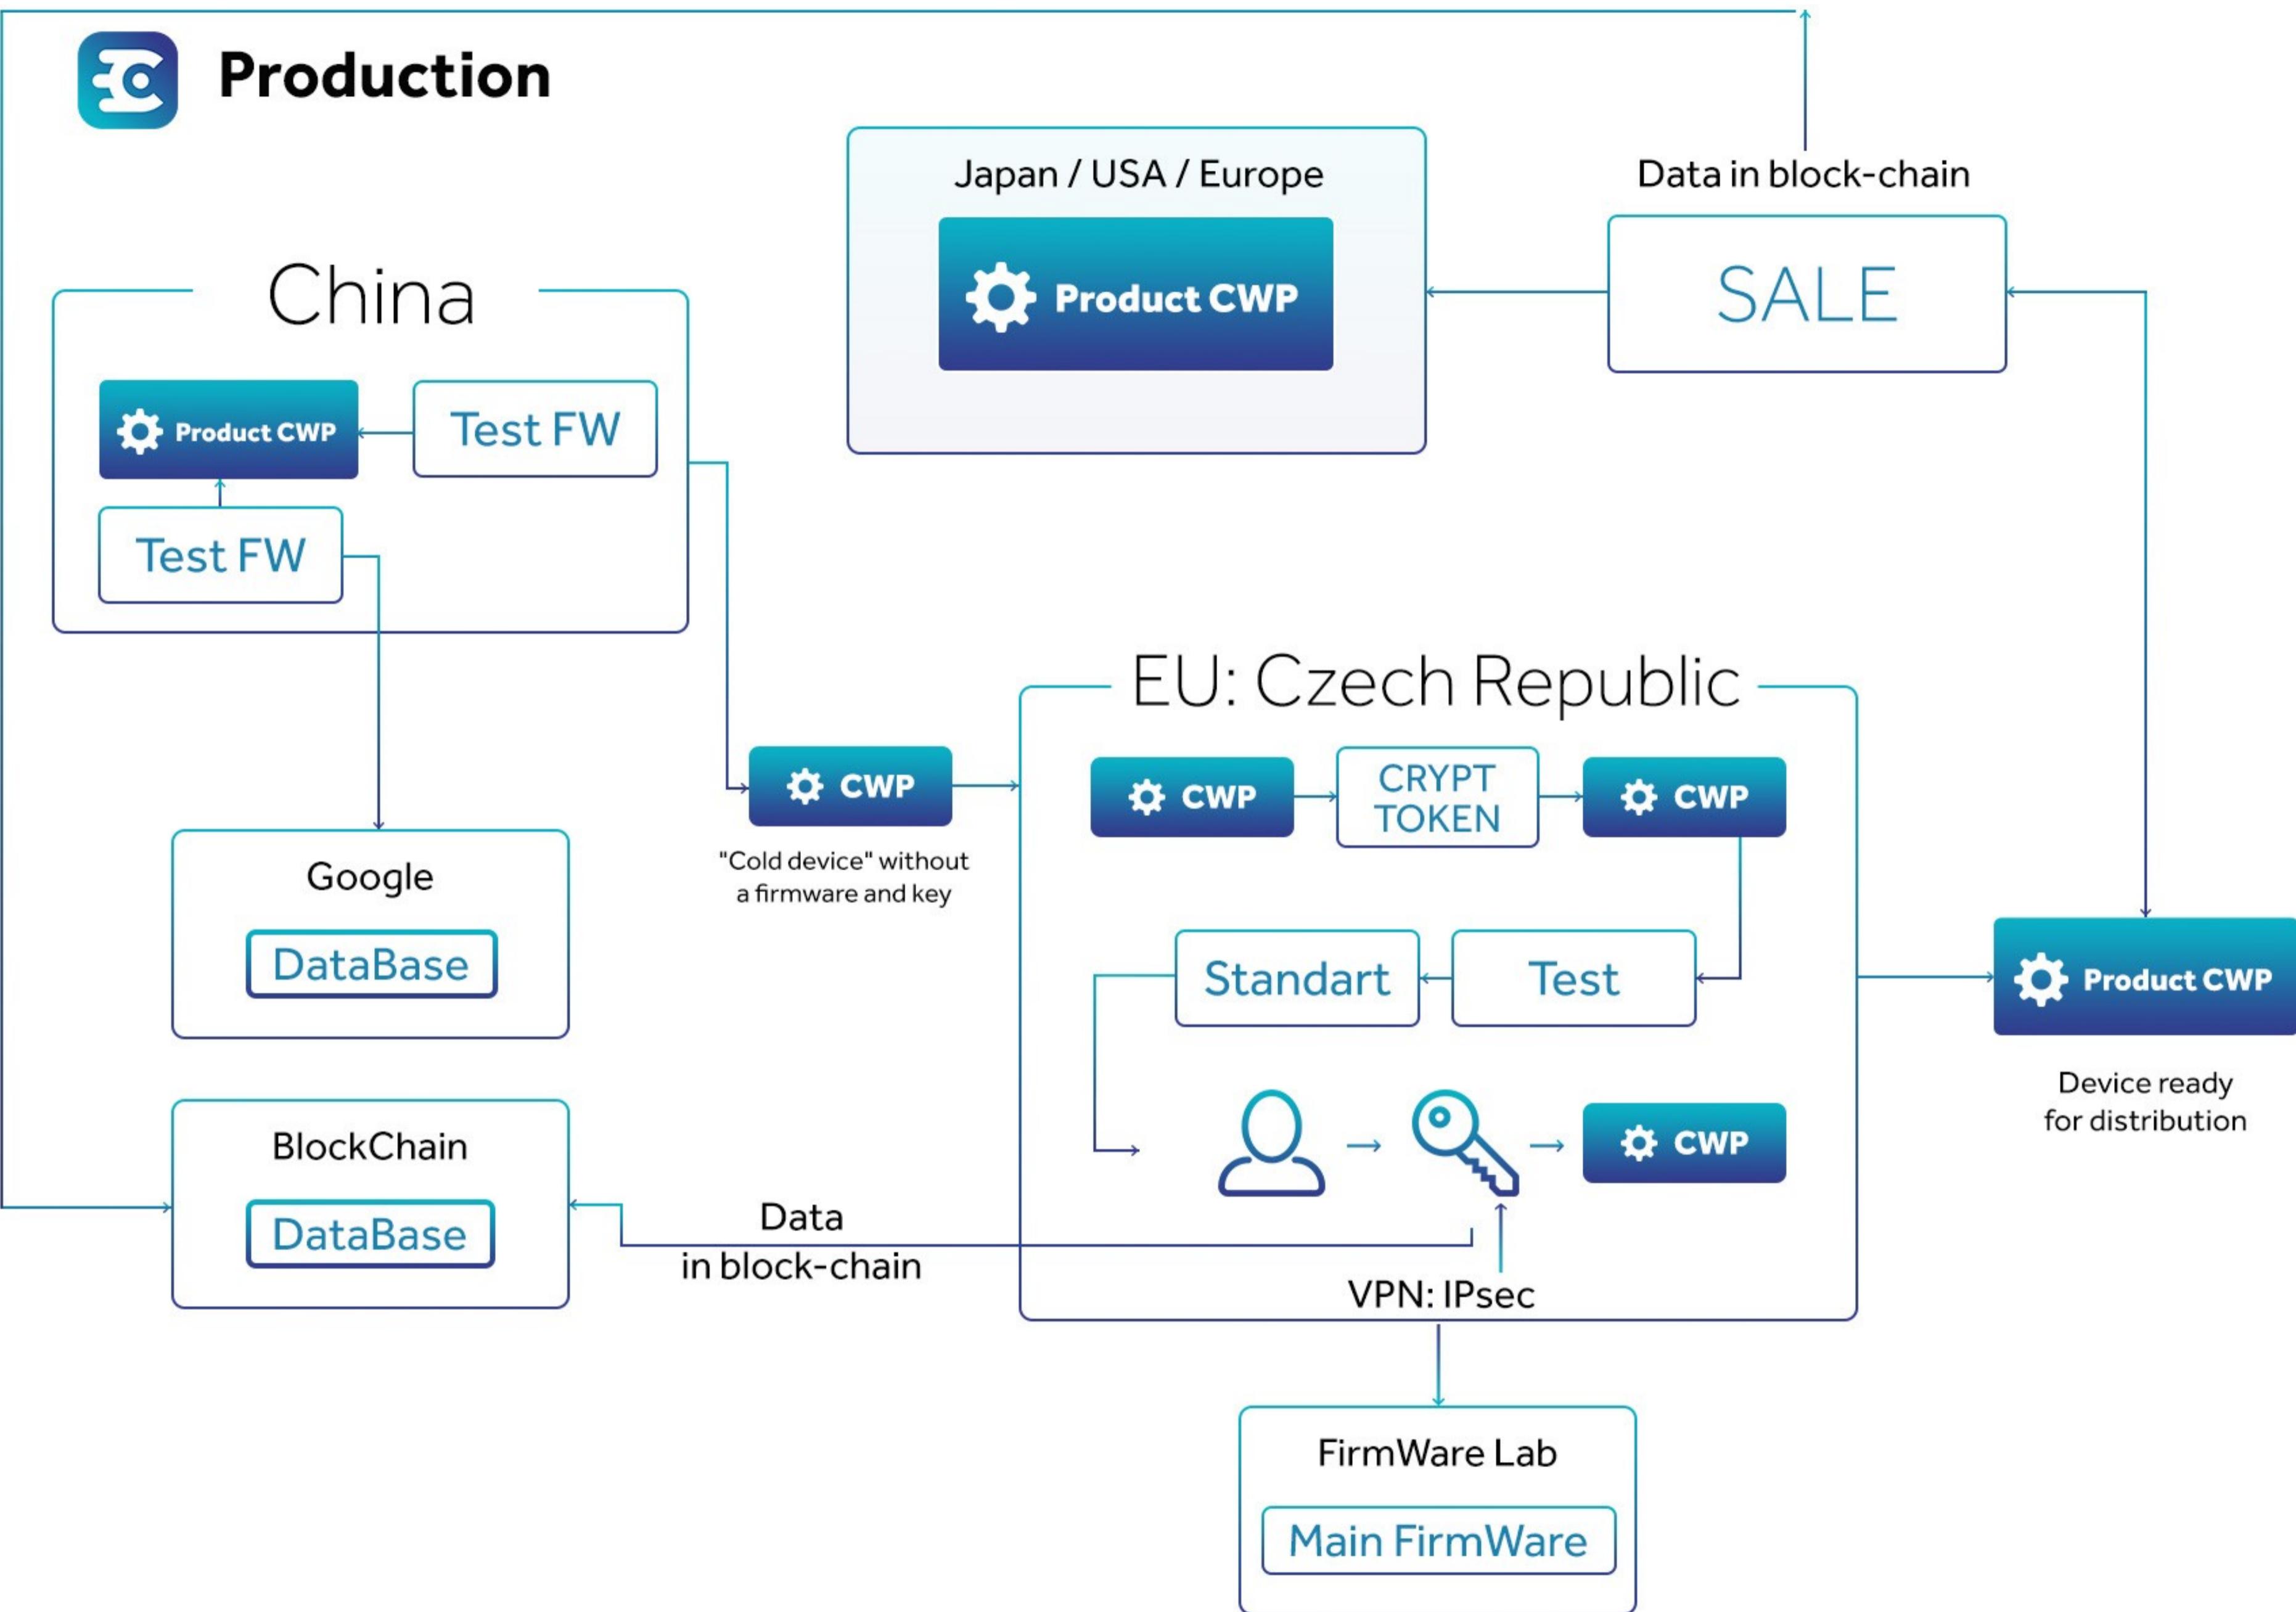

CWP CORP

A solution for corporate clients or user groups with a single administration panel, which allows to adjust each CWP separately or all together based on the common safety policy. Safety policy can include black and white lists, application activation or interlock, installation of applications and updated from application store Branding of devices according to the client's request. Perfect solution for banking, health care and educational communities.

 **Private Pre-Sale**

Time Frame:	Q2 2018
Token:	CWT-P
Soft cap:	400 ETH** (\$240K)
Hard cap:	3000 ETH (\$1.8M)
Tokens for sale:	15,000,000 (3%)
1 CWT-P:	\$0.12

**** 1 ETH = 600 USD**

A pilot batch of micro-computers will be launched if funds exceeding minimum (soft cap) and up to maximum (hard cap) are successfully attracted. Number of CWP micro-computers in the pilot batch is 100 pieces, the number of batches may differ depending on the amount attracted as follows:

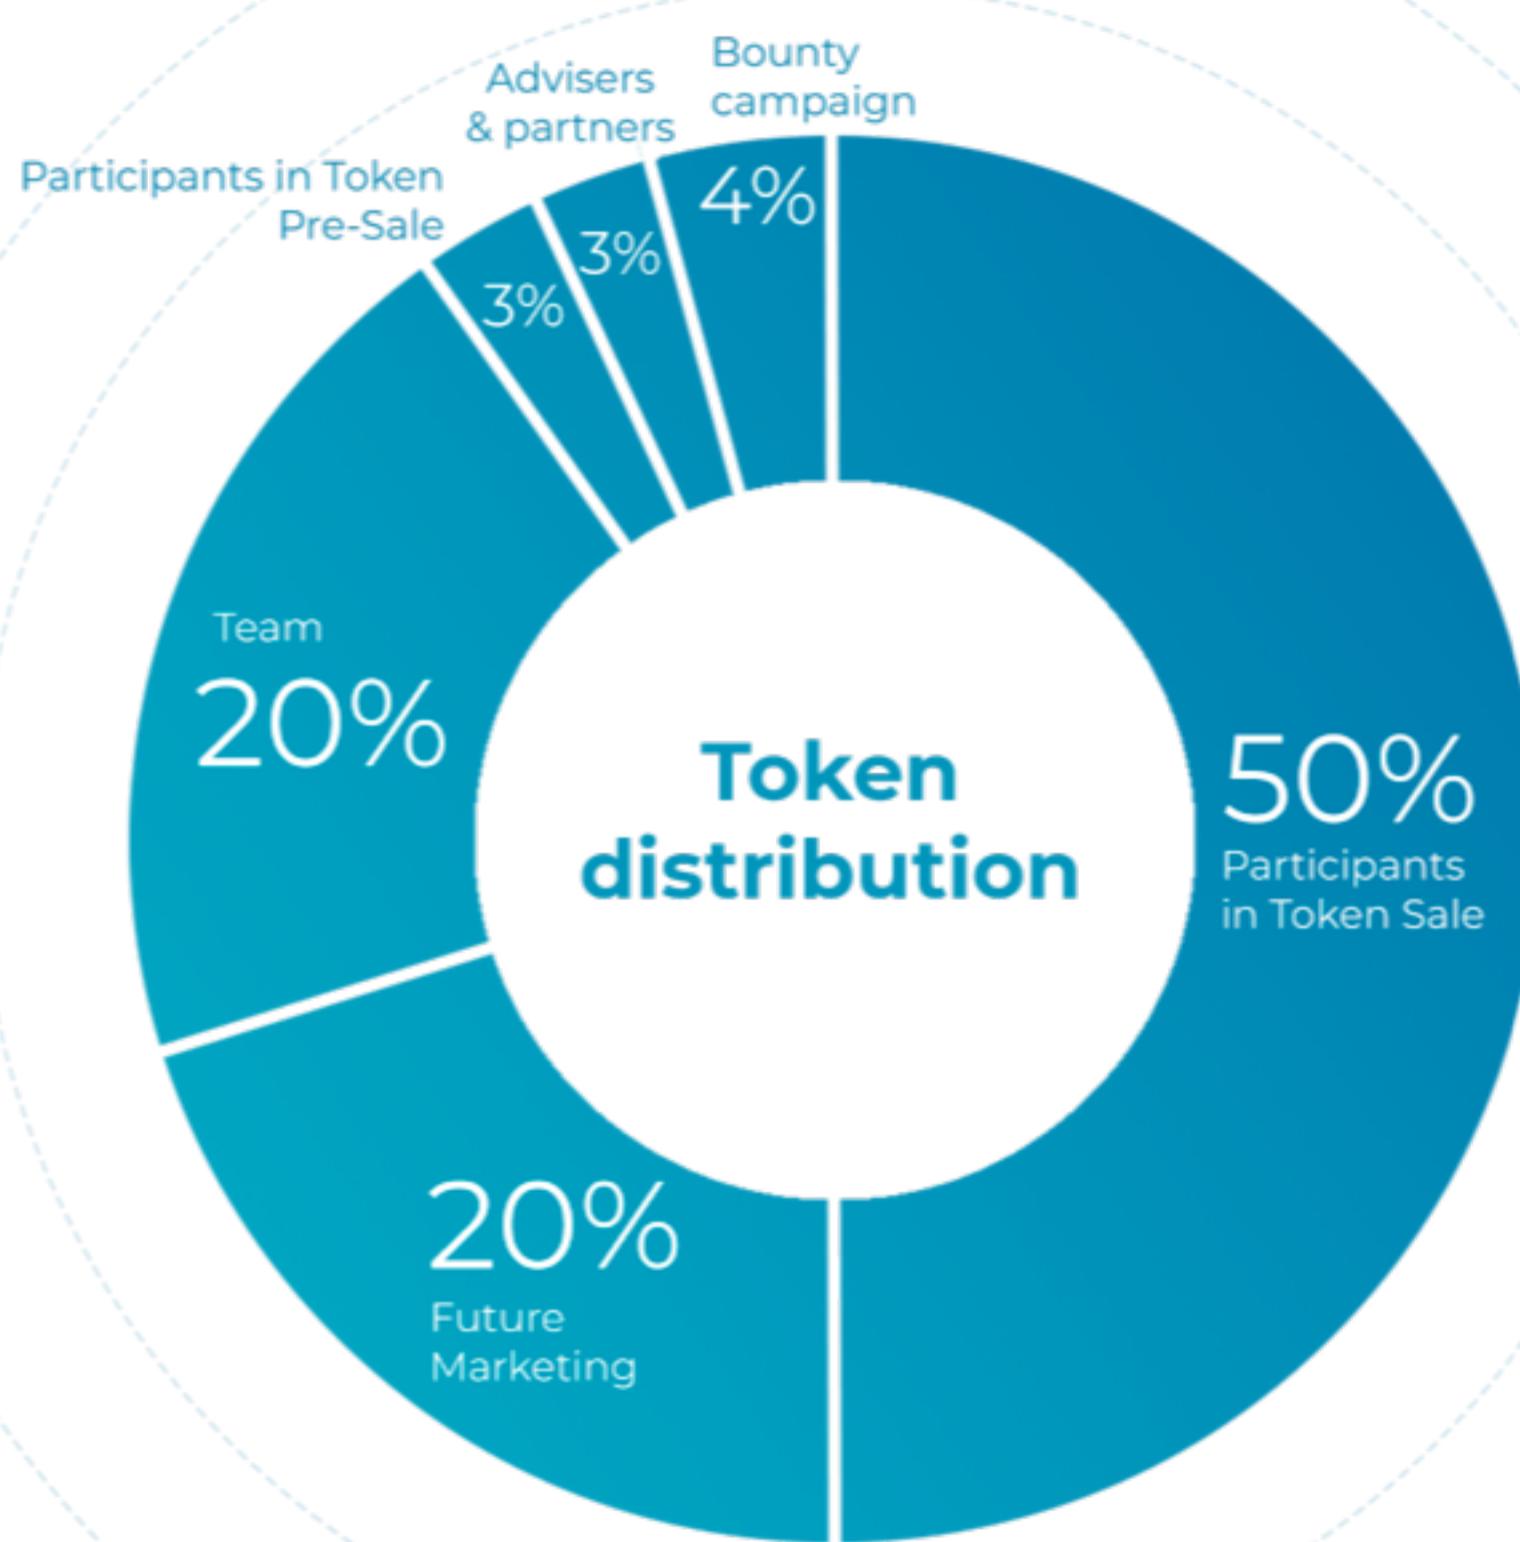

Attracted Amount by the Token Presale Participants	2M CWT	3M CWT	4M CWT	5M CWT	10M CWT	15M CWT
	\$240 000	\$360 000	\$480 000	\$600 000	\$1 200 000	\$1 800 000

The number of batches of the pilot series of 100pcs

Token Generation Event

Token: CWT
Circulation: 500 M
Tokens for sale: 250 M

TGE Period: Q3 2018
Soft cap: \$2.4 M
Hard cap: \$47.4 M

CWT token price increase

- CWT token - utility, is not a share or securities, it is assigned to the actual product
- Smart-contract with team tokens frozen till December 31, 2018
- CWT token owners will have the right to purchase CWP with a 50% discount
- When the product is purchased, tokens spent for the purchase are burnt to prevent double income
- Automatic burning of unused tokens will result in increase of their price while the product will remain popular
- CWT token will be used together with other crypto-currencies and fiat currency as a financial unit to pay for supplementary services in CWP eco-system
